

Synergy 21 LED Tube T5 / T8 to standard power supply unit to emergency power supply 230V

Emergency power supply for 230V products such as LED tubes.

Any other 230V consumers can also be connected, such as LED panels including 230V drivers.

In the event of a power failure, the system automatically switches to battery operation.

Please note that the switching process is not seamless. The switching time is less than one second.

Input Voltage: AC220-240V

Output Voltage: AC/DC220-240V

Emergency Power: 25W

Battery: Li-ion/Ni-cd/Ni-MH, emergency time can be customized

Battery: Battery holder for 18650 is included. Batter must be ordered separately, please check add-ons.

Charging Time: 24 hours

Working Lifetime: 30000h

Overcharge and over discharge protections

Output short circuit protection

Power-off analogue test function

Working temperature: -15 to 45°

Certification: CE, RoHS, MSDS
